(54) Title: DUAL BAND ANTENNA SYSTEM

(57) Abstract: The antenna system for transceiving signals on two frequency bands is small, very efficient and capable of simultaneously transmitting and receiving signals on two frequency bands, while ensuring high decoupling between the two. Two or more microstrip antennas (1A, 1B, 1C, 1D) are arranged on a single dielectric substrate (2), provided with a ground plane (3), equipped with their own feed connection (6) and arranged so as to minimise reciprocal coupling.
